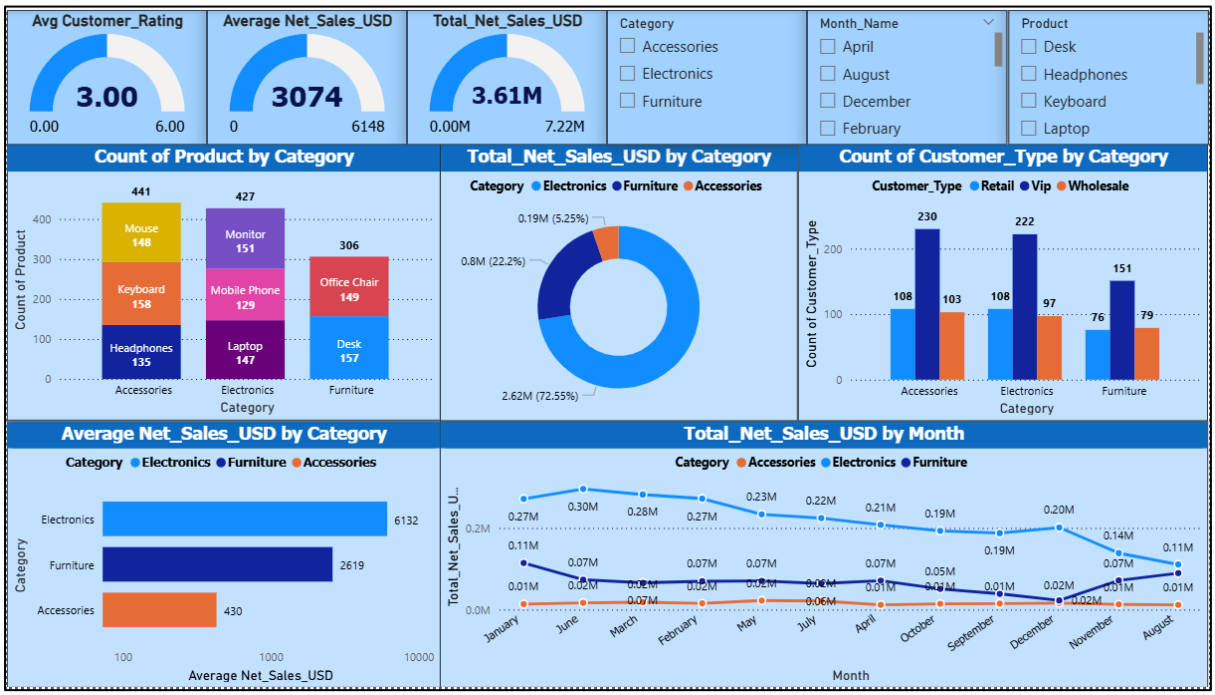
Project: Retail Sales Analysis of an Electronics Store in Myanmar (2020–2023)

Dashboard 1: Category Performance Analysis



Dashboard 2: Regional & Sales_Channel Analysis

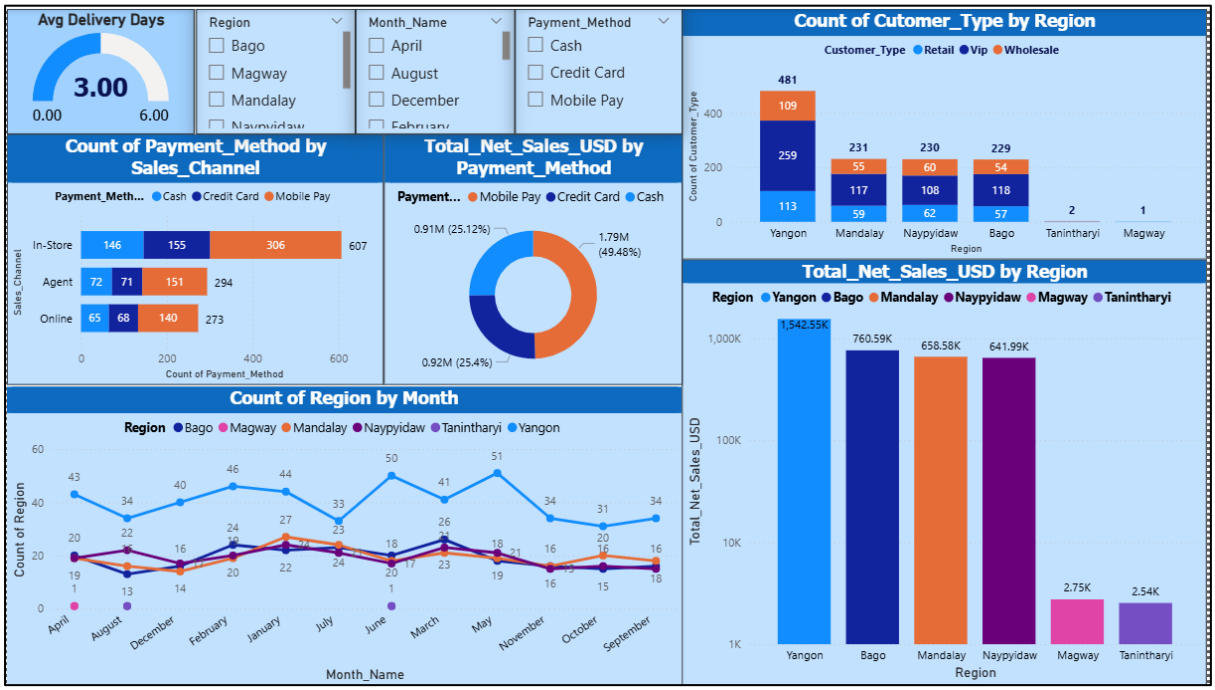


Chart 1: Gauges (Avg Customer Rating, Avg Sales, Total Sales)

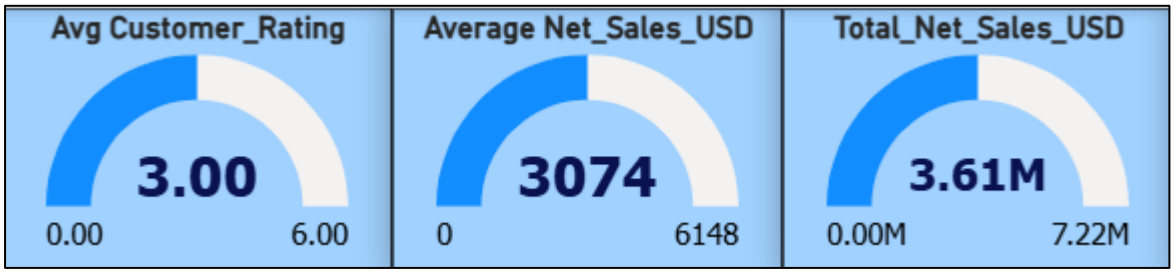
Summary

These gauge visuals show **overall business performance indicators**:

- Average customer rating
- Average sales per transaction
- Total revenue

They provide a quick snapshot of how the business is performing.



Key Insights

- **Average Customer Rating is 3.0**
  Indicates moderate satisfaction (not excellent)
- **Average Sales is 3074**
  Shows a balanced transaction value across categories
- **Total Sales reached 3.61M**
  Strong overall revenue performance

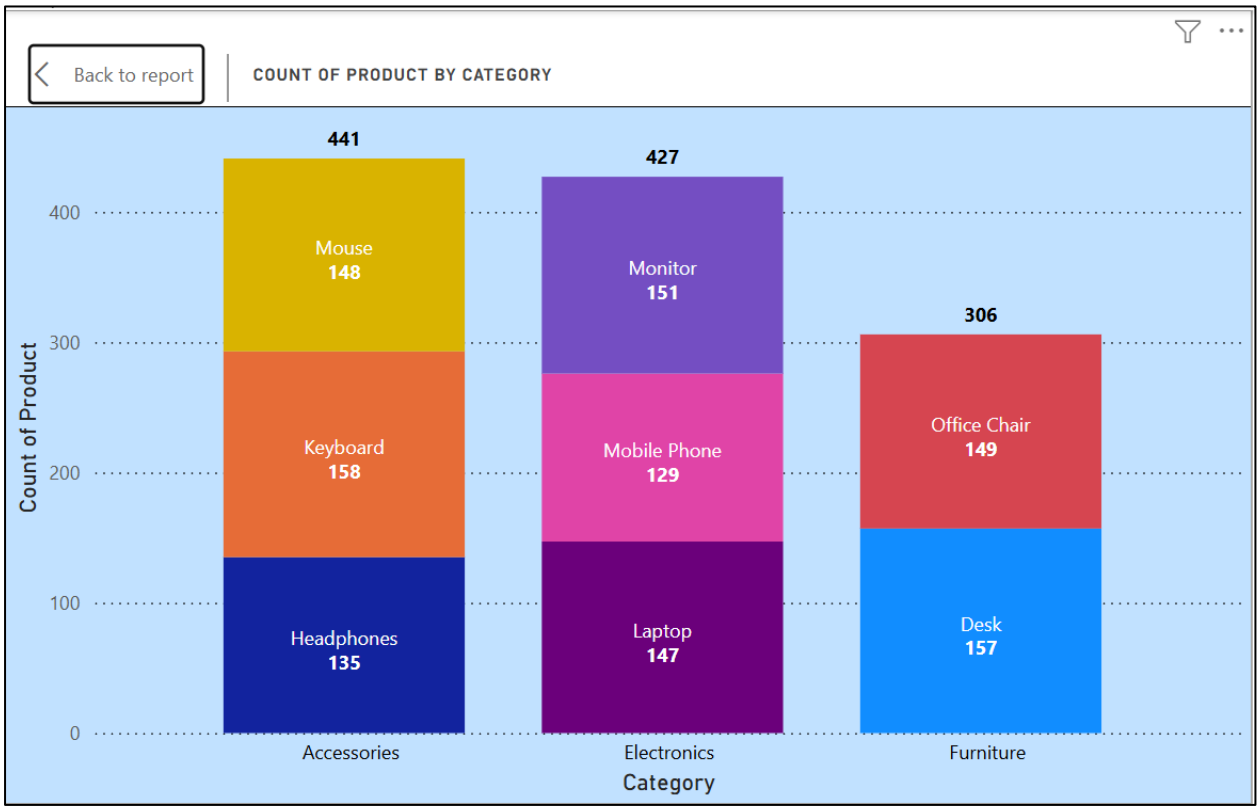
Business Recommendations

- Improve **customer experience** to increase ratings (service, delivery, quality)
- Focus on **upselling and cross-selling** to increase average sales
- Maintain strong **revenue performance** by focusing on top categories (Electronics)

Chart 2: Count of Product by Category

Summary

This chart shows the **number of products available in each category** - Accessories, Electronics, and Furniture - along with their individual product types.



Key Insights

- **Accessories has the highest product count (441)**
  Includes Mouse (148), Keyboard (158), Headphones (135)
- **Electronics is slightly lower (427)**
  Includes Monitor (151), Laptop (147), Mobile Phone (129)
- **Furniture has the lowest product count (306)**
  Includes Desk (157) and Office Chair (149)
- **Product distribution within each category is fairly balanced**
  No extreme dominance by a single product
- **Accessories and Electronics offer more variety compared to Furniture**

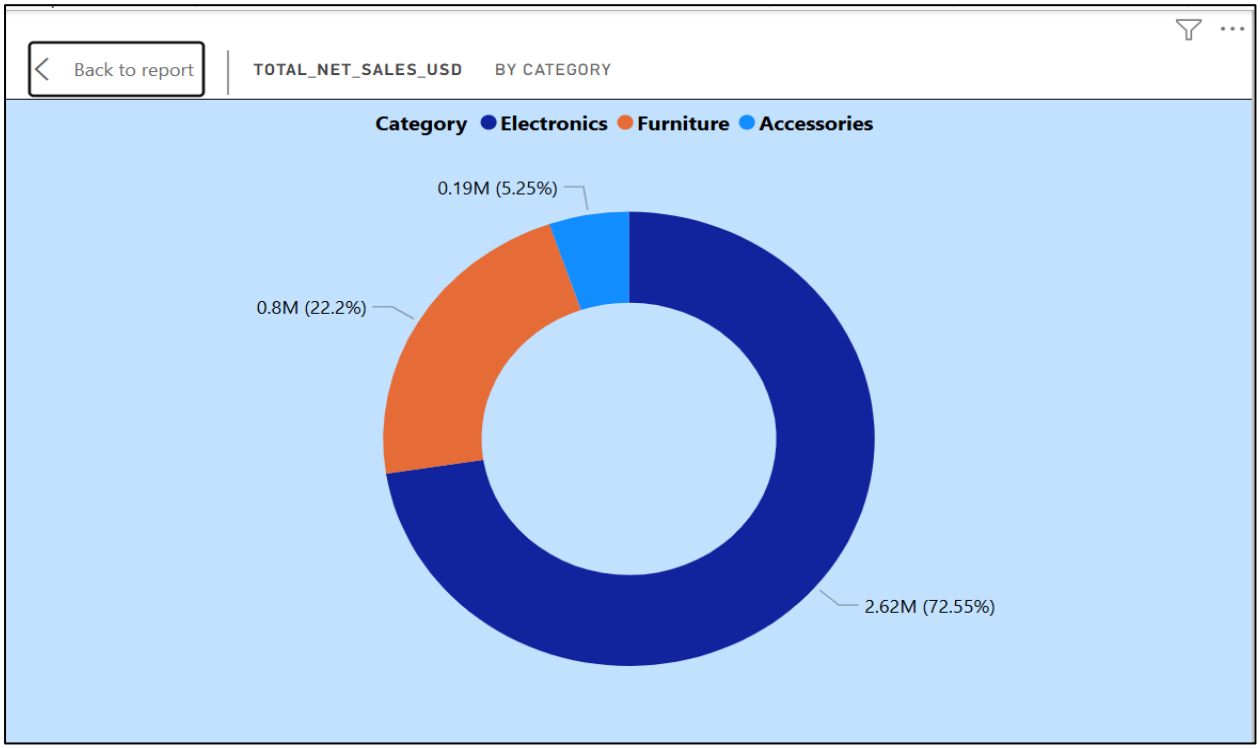
Business Recommendations

- Expand **Furniture product range** to improve variety and potential sales
- Maintain strong product availability in **Accessories and Electronics**
- Introduce **new product variants** in high-performing categories
- Use **bundling strategies** (e.g., Accessories with Electronics) to increase sales

Chart 3: Total Net Sales by Category

Summary

This chart shows the **distribution of total revenue across product categories**.
Electronics contributes the majority of total sales, followed by Furniture, while Accessories contribute a very small portion.



Key Insights

- **Electronics generates the highest revenue (2.62M, 72.55%)**
  Dominates overall sales performance
- **Furniture contributes moderate revenue (0.8M, 22.2%)**
  Second highest contributor
- **Accessories contributes the lowest revenue (0.19M, 5.25%)**
  Very small share despite product availability
- Large gap between Electronics and other categories
  Revenue is heavily concentrated in one category

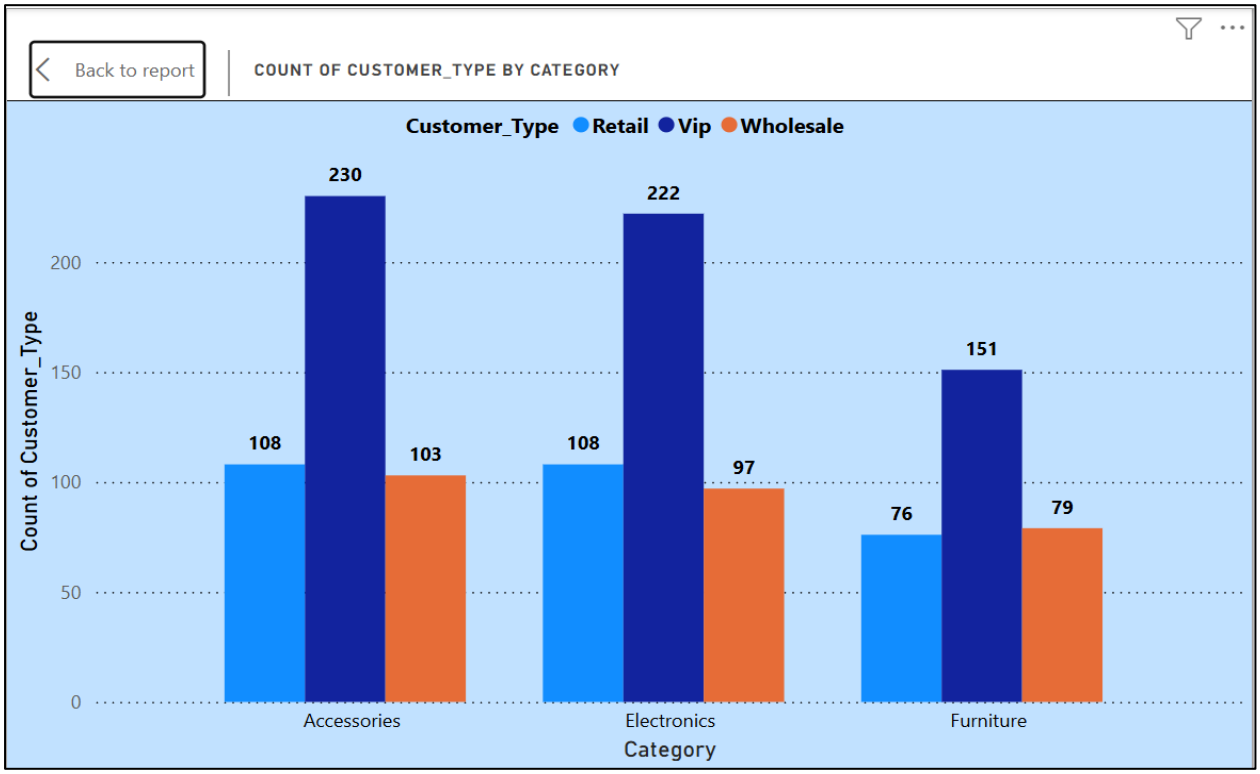
Business Recommendations

- Focus on **Electronics** to sustain and maximize revenue
- Improve **Accessories sales performance** through promotions and bundling
- Strengthen **Furniture category** to balance revenue contribution
- Reduce dependency on a single category by diversifying growth

Chart 4: Count of Customer Type by Category

Summary

This chart shows the **distribution of customer types (Retail, VIP, Wholesale) across different product categories**. VIP customers are the highest in all categories, followed by Retail and then Wholesale.



Key Insights

- **VIP customers are highest in all categories**
  Accessories (230), Electronics (222), Furniture (151)
- **Retail customers are consistent in Accessories and Electronics (108 each)**
  Lower in Furniture (76)
- **Wholesale customers are lowest across all categories**
  Accessories (103), Electronics (97), Furniture (79)
- **Furniture has overall lower customer counts across all segments**
  Indicates lower demand or fewer transactions
- **Customer distribution pattern is consistent across categories**
  VIP > Retail > Wholesale

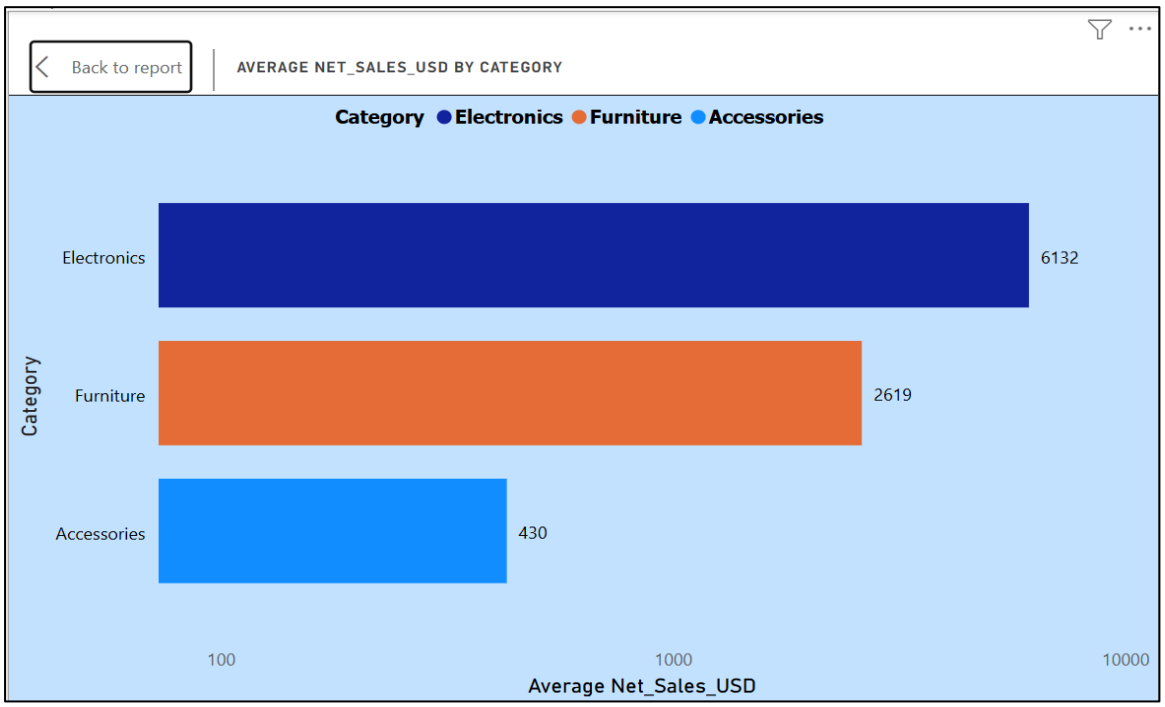
Business Recommendations

- Focus on **VIP customer retention** (loyalty programs, exclusive offers)
- Increase **Retail to VIP conversion** through targeted strategies
- Improve **Wholesale engagement across all categories** (pricing, bulk offers)
- Boost **Furniture demand** through promotions and better positioning

Chart 5: Average Net Sales USD by Category

Summary

This chart shows the **average sales value per transaction** for each category.
Electronics has the highest average sales, followed by Furniture, while Accessories have the lowest.



Key Insights

- **Electronics has the highest average sales (6132)**
  Indicates high-value products
- **Furniture has moderate average sales (2619)**
  Mid-range transaction value
- **Accessories have the lowest average sales (430)**
  Low-cost items
- **Significant gap between Electronics and Accessories**
  Strong difference in pricing/value
- **Revenue is driven more by value** (Electronics) **than volume** (Accessories)

Business Recommendations

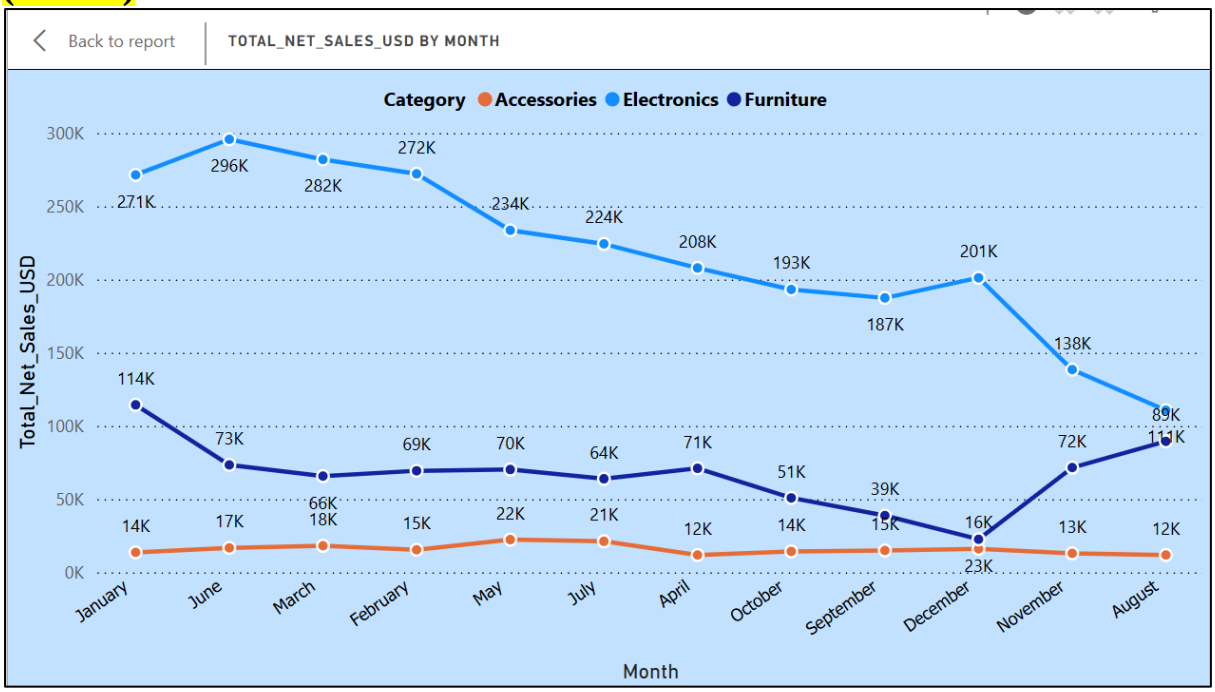
- Focus on **Electronics** to maximize high-value transactions
- Use **Accessories as add-on products** (bundling strategy)
- Improve **Furniture positioning** (premium or competitive pricing)
- Encourage **combo offers** to increase average order value

Chart 6: Total Net Sales USD by Month &Year Hierarchy

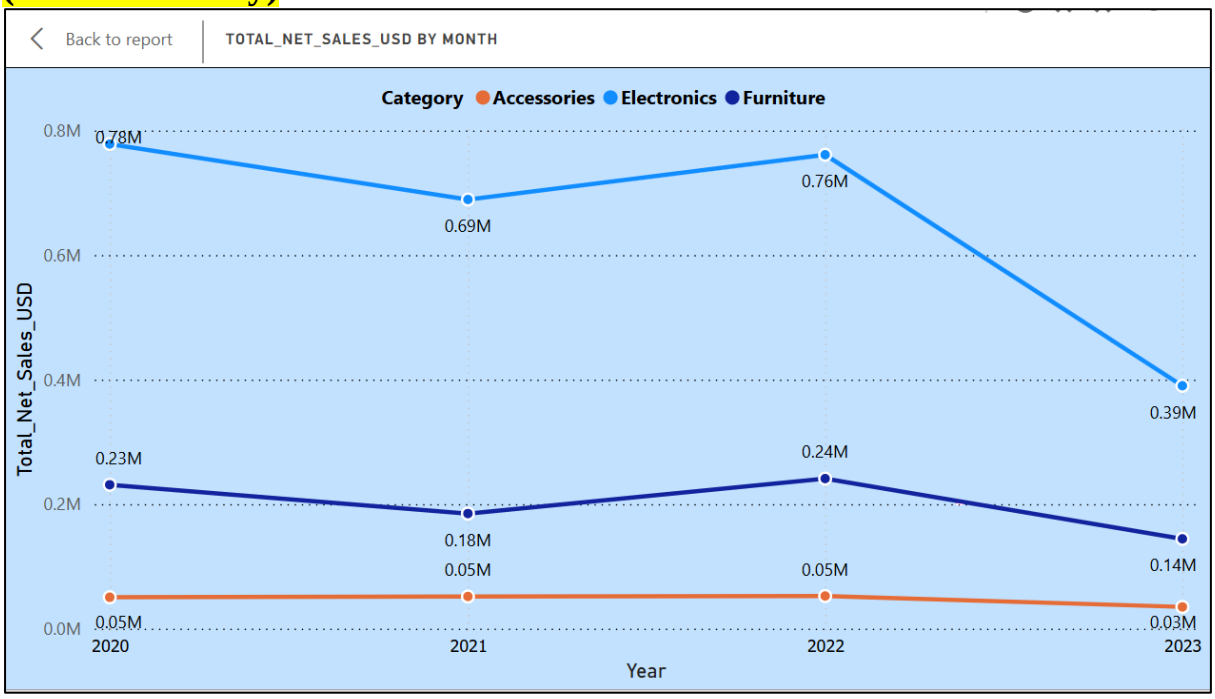
Summary

This chart shows the **sales trend across months and years for each category**. Electronics consistently generates the highest sales across all months and years, while Accessories contribute the least. Overall, sales fluctuate monthly and show variation across years.

(Month)



(Year Hierarchy)



Key Insights

1) Category-wise (Monthly Trend)

- **Electronics dominates in every month**
  Peaks around ~296K and declines toward ~89K
- **Furniture shows moderate performance**
  Fluctuates between ~114K and ~11K
- **Accessories remain consistently low**
  Mostly between ~12K–23K
- **Overall declining trend observed across months**
  Higher at beginning, lower in later months

2) Year-wise Trend (Hierarchy View)

- 2020 shows strong performance (Electronics ~0.78M)
- 2021 shows a slight drop (~0.69M)
- 2022 shows recovery (~0.76M)
- 2023 shows a significant decline (~0.39M)
- Furniture follows similar trend (0.23M → 0.18M → 0.24M → 0.14M)
- Accessories remain low and stable (~0.03M–0.05M)

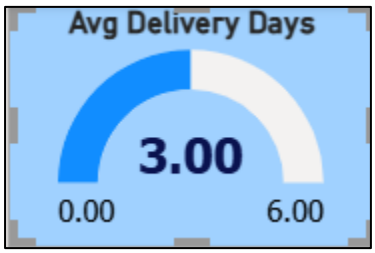
Business Recommendations

- Introduce **mid-year promotions** to prevent decline
- Launch **seasonal campaigns** after Q1
- Analyze reasons for drop (competition, demand, pricing)
- Focus on **retention strategies** for later months
- Plan **discounts or offers during low-performing months**
- Focus on **Electronics category** to sustain revenue across all periods
- Investigate reasons for **decline in 2023** and take corrective action
- Introduce **seasonal and monthly promotions** to stabilize sales
- Improve **Furniture performance** through targeted campaigns
- Use **Accessories as add-on products** to increase overall sales

Chart 7: Gauge (Average Delivery Days)

Summary

This chart shows the **average time taken to deliver products**, which is currently **3 days**.
It reflects the efficiency of the delivery process.



Key Insights

- **Average delivery time is 3 days**
  Indicates moderate delivery speed
- **Delivery is neither very fast nor very slow**
  Acceptable but not highly efficient
- **Consistent delivery performance**
  No extreme delays observed
- **Opportunity to improve for better customer satisfaction**

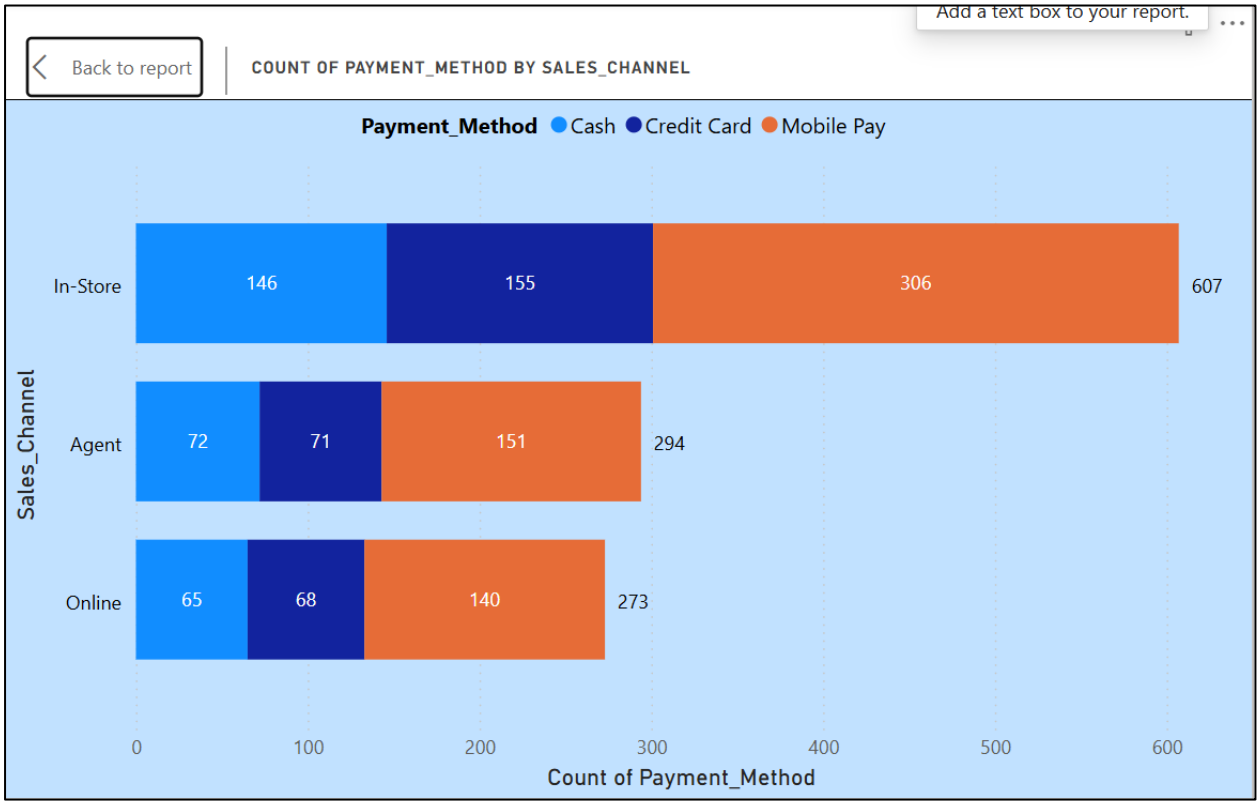
Business Recommendations

- Optimize **logistics and supply chain** to reduce delivery time
- Aim for **2 days or less delivery** for competitive advantage
- Improve **last-mile delivery efficiency**
- Offer **fast delivery options for VIP customers**

Chart 8: Count of Payment Method by Sales Channel

Summary

This chart shows how different **payment methods (Cash, Credit Card, Mobile Pay)** are used across various **sales channels (In-Store, Agent, Online)**. Mobile Pay is the most commonly used payment method across all channels, and In-Store has the highest overall transactions.



Key Insights

- **In-Store channel has the highest total transactions (607)**
  Cash (146), Credit Card (155), Mobile Pay (306)
- **Agent channel has moderate transactions (294)**
  Mobile Pay (151) is highest within this channel
- **Online channel has the lowest transactions (273)**
  Lower usage compared to other channels
- **Mobile Pay is the most used payment method across all channels**
  In-Store (306), Agent (151), Online (140)
- **Cash and Credit Card usage are relatively similar across channels**
  No major difference between

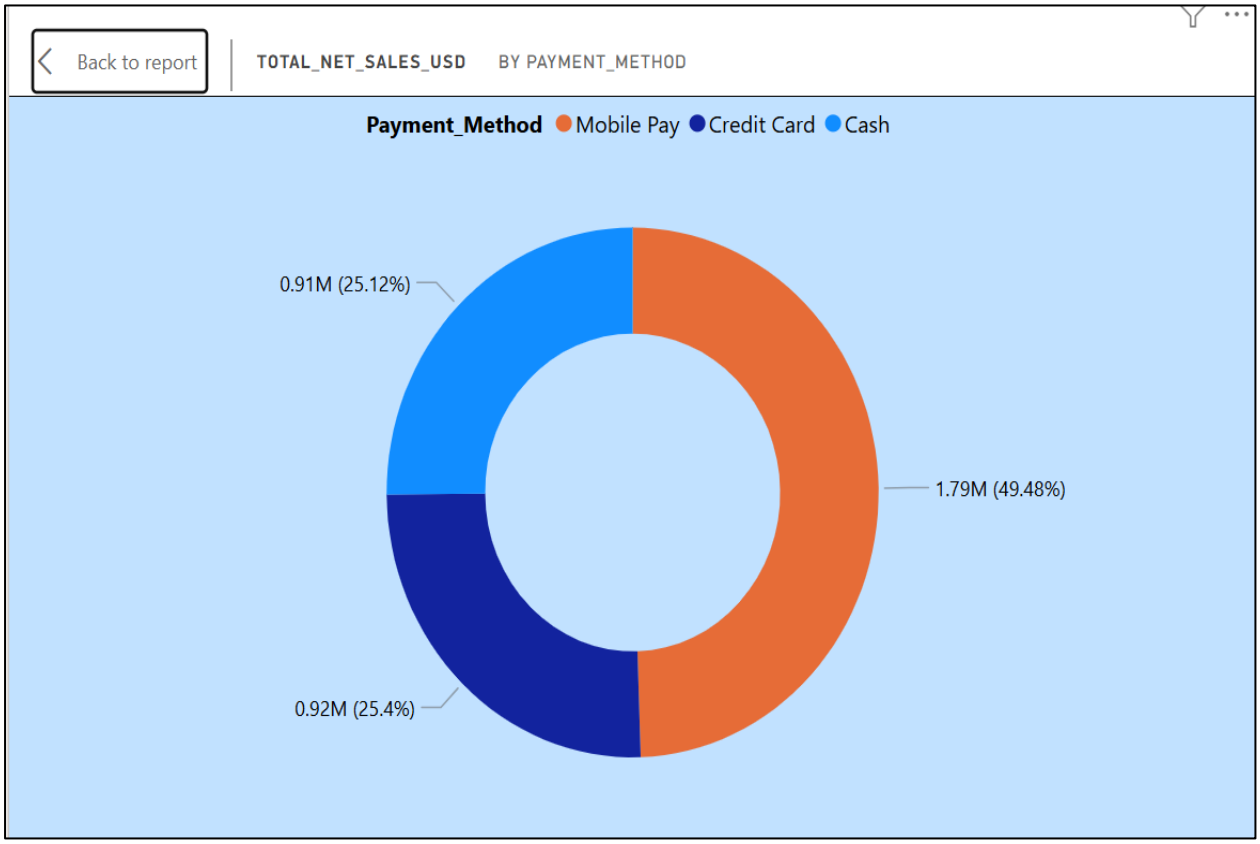
Business Recommendations

- Promote **Mobile Pay** with offers to maintain and increase usage
- Improve **Online channel performance** (user experience, marketing)
- Expand successful **In-Store strategies to other channels**
- Encourage **digital payments** over traditional methods for efficiency
- Strengthen **Agent channel performance** to match In-Store

Chart 9: Total Net Sales USD by Payment Method

Summary

This chart shows the **distribution of total revenue across different payment methods**. Mobile Pay contributes the largest share of revenue, while Credit Card and Cash contribute almost equally.



Key Insights

- **Mobile Pay contributes the highest revenue (~49.5%, 1.79M)**
  Most preferred and impactful payment method
- **Credit Card (~25.4%) and Cash (~25.1%) are almost equal**
  Traditional methods still relevant
- **Digital payments (Mobile Pay) dominate overall transactions**
  Shift towards cashless economy
- **Revenue distribution is highly dependent on Mobile Pay**

Business Recommendations

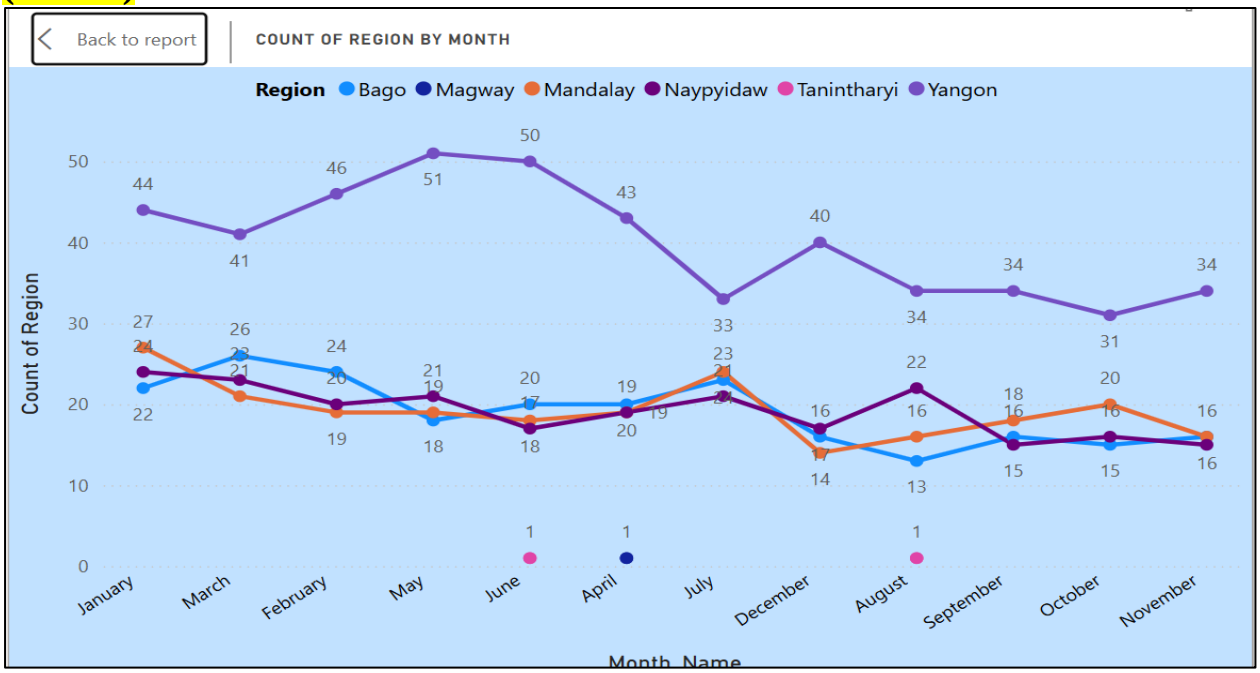
- Promote **Mobile Pay with offers/cashbacks** to maintain dominance
- Improve **Credit Card and Cash incentives** to balance usage
- Encourage **cashless transactions** for efficiency
- Partner with **digital payment platforms** to increase adoption
- Use payment-based offers to influence customer behavior

Chart 10: Count of Region by Month & Year Hierarchy

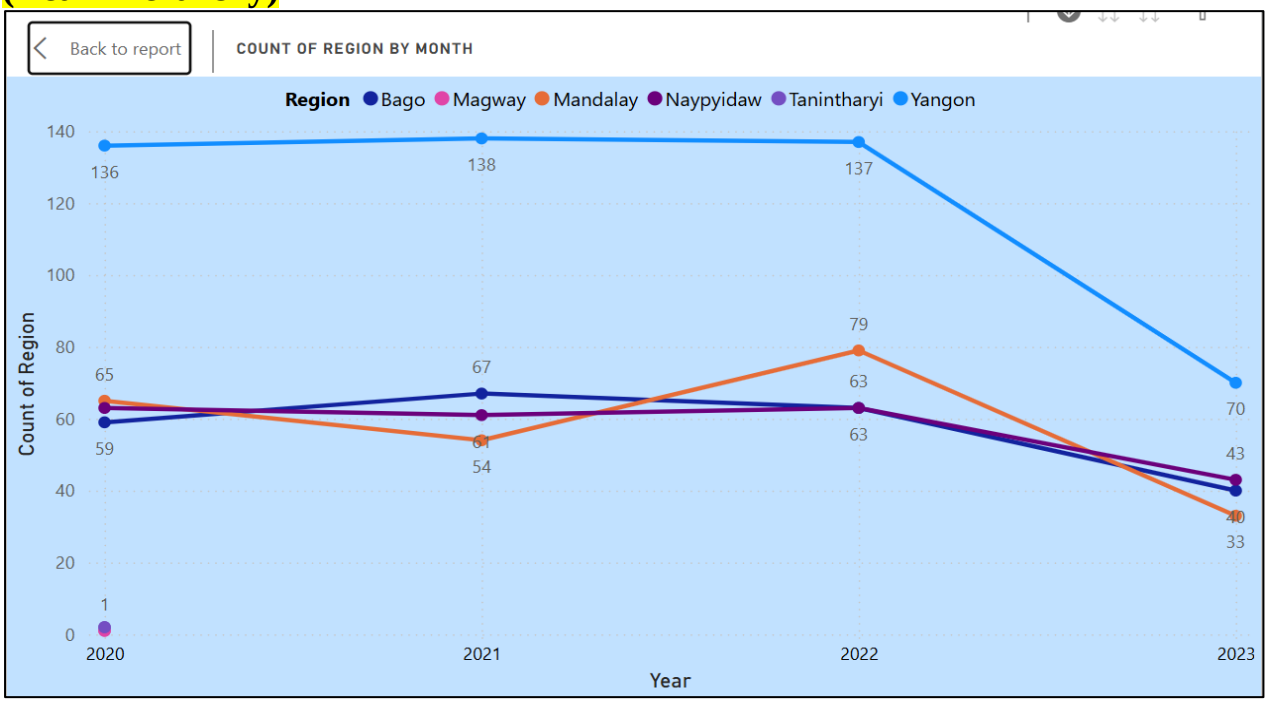
Summary

This chart shows how **regional activity varies across months and years**.
Yangon consistently has the highest counts, while the number of active regions reduces over time, with fewer regions present in later years compared to 2020.

(Month)



(Year Hierarchy)



Key Insights (Month-wise)

- **Yangon consistently leads in all months**
  Highest counts (~31–51 range)
- **Other regions (Bago, Mandalay, Naypyidaw, Magway)** show moderate variation
  Mostly range between ~13 to ~27
- **Mandalay and Naypyidaw show occasional peaks**
  Example: Mandalay (~23 in July)
- **Fluctuation observed across months for most regions**
  No consistent upward or downward trend
- **Tanintharyi shows minimal presence (values around 1)**
  Negligible contribution across months

Key Insights (Year-wise)

- **2020 shows full regional coverage (all 6 regions active)**
  Highest regional diversity
- **From 2021 to 2023, only 4 regions are consistently active**
  Indicates reduction in regional coverage
- **Yangon remains dominant across all years**
  2020 (136), 2021 (138), 2022 (137), 2023 (70)
- **Mandalay peaks in 2022 (~79)**
  Strong temporary growth
- **Overall decline observed in 2023 across all major regions**
  Significant drop compared to previous years
- **Magway and Tanintharyi show little to no presence after 2020**
  Minimal contribution in later years

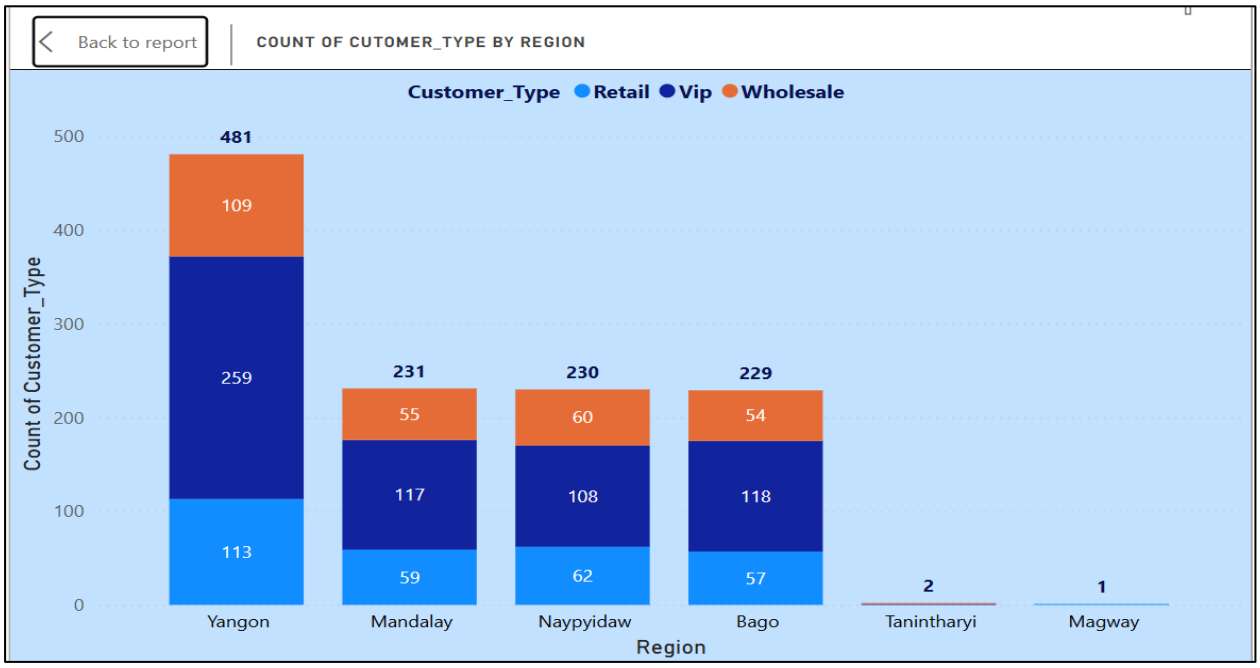
Business Recommendations

- Investigate why **only 4 regions remain active after 2020**
- Re-expand into **inactive regions (Magway, Tanintharyi)**
- Strengthen **mid-performing regions (Bago, Naypyidaw, Mandalay)**
- Maintain and scale **Yangon as the core region**
- Address the **decline in 2023** with targeted strategies
- Implement **region-specific marketing and distribution plans**

Chart 11: Count of Customer Type by Region

Summary

This chart shows how different **customer types (Retail, VIP, Wholesale)** are distributed across regions. Yangon has the highest number of customers across all segments, while other regions have significantly lower counts.



Key Insights

- **Yangon dominates with the highest total customers (481)**
  Major business hub
- **VIP customers are highest in all regions**
  Especially strong in Yangon (259)
- **Mandalay, Naypyidaw, and Bago show moderate and similar patterns (~230 range)** Balanced regional performance
- **Tanintharyi and Magway have extremely low counts**
  Minimal contribution to business
- **Customer distribution pattern is consistent across regions**
  VIP > Retail > Wholesale

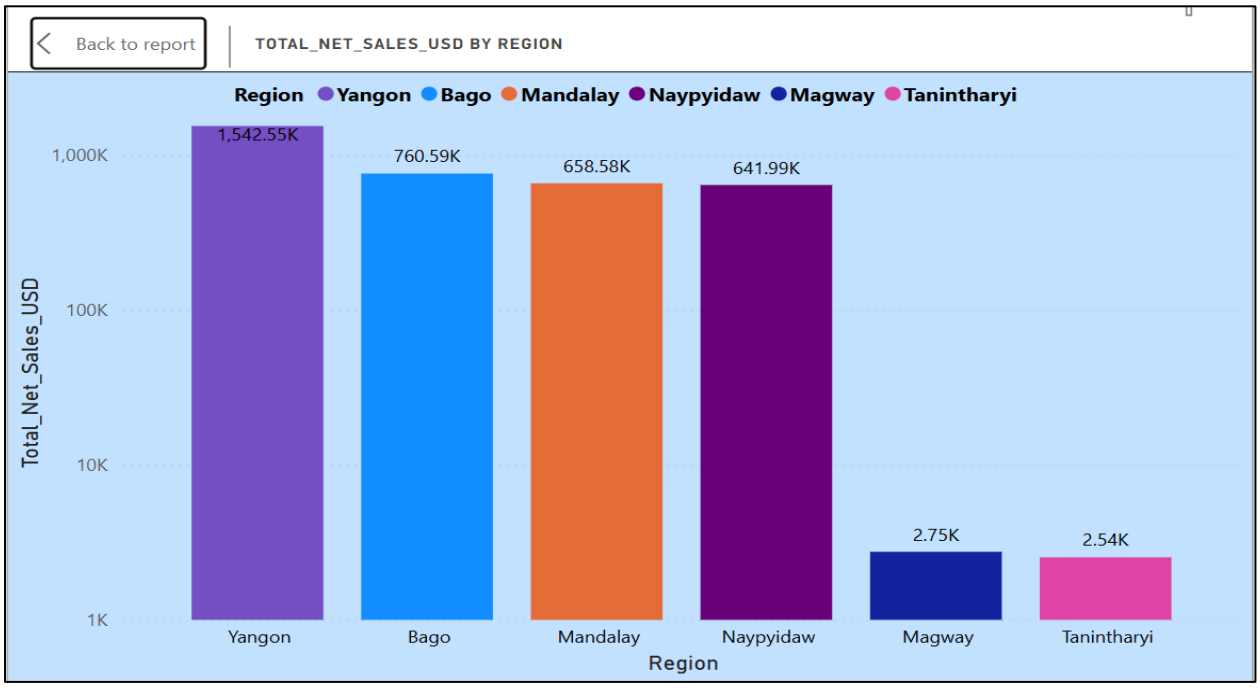
Business Recommendations

- Focus heavily on **Yangon for revenue growth and retention**
- Expand marketing efforts in **low-performing regions (Tanintharyi, Magway)**
- Strengthen **VIP customer programs across all regions**
- Increase awareness and accessibility in smaller regions
- Replicate successful strategies from Yangon in other regions

Chart 12: Total Net Sales USD by Region

Summary

This chart shows how **total revenue is distributed across different regions**. Yangon generates the highest sales by a large margin, while Magway and Tanintharyi contribute very little.



Key Insights

- **Yangon is the top-performing region (~1.54M)**
  Major contributor to total revenue
- **Bago, Mandalay, and Naypyidaw have moderate and similar sales (~640K–760K)**
  Secondary revenue contributors
- **Magway and Tanintharyi have extremely low sales (~2K–3K)**
  Minimal contribution
- **Huge gap between Yangon and other regions**
  Strong regional imbalance
- **Revenue concentration is highly dependent on Yangon**

Business Recommendations

- Focus on **Yangon to maintain strong revenue performance**
- Expand successful strategies from Yangon to other regions
- Improve **low-performing regions (Magway, Tanintharyi)** through marketing and distribution
- Strengthen **mid-performing regions** to balance revenue contribution
- Reduce dependency on a single region by diversifying growth

Top 5 Key Insights

1) Electronics drives the business
   - Contributes **~72% of total revenue**
   - Highest average sales per transaction
     ☞ Core profit generator

2) Accessories underperform despite high product count
   - Highest number of products
   - Lowest revenue contribution (~5%)
     ☞ Inefficient product performance

3) Yangon is the dominant region
   - Highest customers + highest sales (~1.5M)
     ☞ Primary business hub

4) VIP customers are the most valuable
   - Highest count across all categories and regions
     ☞ Key target segment

5) Sales variation across month and years
   - Strong performance in earlier periods (e.g., 2020-2022, peak months ~296K)
   - Noticeable decline in later periods (e.g., 2023 ~0.39M yearly trend, lower monthly values ~89K)
     ☞ Indicates time-based fluctuation (seasonality + recent decline trend)

Business Recommendations

1) Product Strategy
   - Focus on **Electronics expansion** (high-value category)
   - Improve **Accessories performance** through bundling and promotions
   - Strengthen **Furniture positioning** to increase contribution

2) Regional Strategy
   - Expand successful strategies from **Yangon to other regions**
   - Improve low-performing regions **(Magway, Tanintharyi)**
   - Reassess **regional coverage reduction after 2020**

3) Customer Strategy
   - Retain **VIP customers** through loyalty programs
   - Convert **Retail customers into VIP** using targeted offers
   - Improve **Wholesale engagement across categories**

4) Sales & Marketing Strategy
   - Introduce **time-based (monthly & seasonal) promotions**
   - Address **decline in recent periods (especially 2023)**
   - Focus on **low-performing months and periods**

5) Digital Strategy
   - Promote **Mobile Pay (cashback, offers)**
   - Strengthen **Online sales channel performance**
   - Maintain strong **In-store performance** while improving digital adoption

Final Project Summary

1) Descriptive Analysis (What happened?)

- The analysis shows that **Electronics is the top-performing category**, contributing the highest revenue due to its high average transaction value. In contrast, **Accessories have a high product count but generate very low revenue**, indicating a gap between product volume and profitability.
- From a regional perspective, **Yangon dominates both customer count and total sales**, making it the primary business hub. Other regions contribute moderately, while **Magway and Tanintharyi show very low performance**.
- **Regional coverage analysis shows that in 2020, all 6 regions were active (full coverage), whereas from 2021 to 2023 only 4 regions remained consistently active**, indicating a reduction in regional presence over time.
- Customer analysis reveals that **VIP customers are the most dominant segment**, contributing the highest number of transactions across categories and regions.
- Sales analysis across **months and years shows variation over time**, with differences observed across periods rather than a uniform trend.

2) Diagnostic Analysis (Why it happened?)

- The high revenue from Electronics is driven by its **high-value transactions**, while Accessories generate lower revenue due to their **low-cost nature**.
- Yangon's dominance is supported by its **higher concentration of customers**, especially VIP customers, who contribute more transactions and revenue.
- The reduction in active regions after 2020 may indicate **operational limitations, reduced market expansion, or lower demand in certain regions**.
- The **moderate customer rating (3.0)** and **average delivery time (3 days)** suggest that customer experience is acceptable but has room for improvement.
- The variation in sales across **months and years suggests seasonality, changing demand patterns, or inconsistent marketing efforts**, rather than a continuous decline.

3) Predictive Analysis (What could happen?)

- Based on **monthly and yearly trends**, sales fluctuate over time, with stronger performance in earlier periods (**2020–2022**) and comparatively lower performance in recent periods (**2023**).
- If this pattern continues, the business may experience **inconsistent revenue and reduced regional coverage**, especially in later periods.
- These insights support planning for **time-based strategies, regional expansion, and demand forecasting**.

4) Prescriptive Analysis (What should be done?)

To improve overall business performance, the following actions are recommended:

- Focus on **Electronics category** to maximize revenue
- Improve **Accessories performance** through bundling and promotions
- Expand successful strategies from **Yangon to other regions**
- **Re-expand into inactive or low-performing regions** (Magway, Tanintharyi)
- Target and retain **VIP customers**
- Introduce **time-based (monthly/seasonal) promotions** to stabilize sales
- Improve **delivery efficiency** to enhance customer satisfaction
- Promote **Mobile Pay and digital transactions**
- Strengthen **online sales channels**
