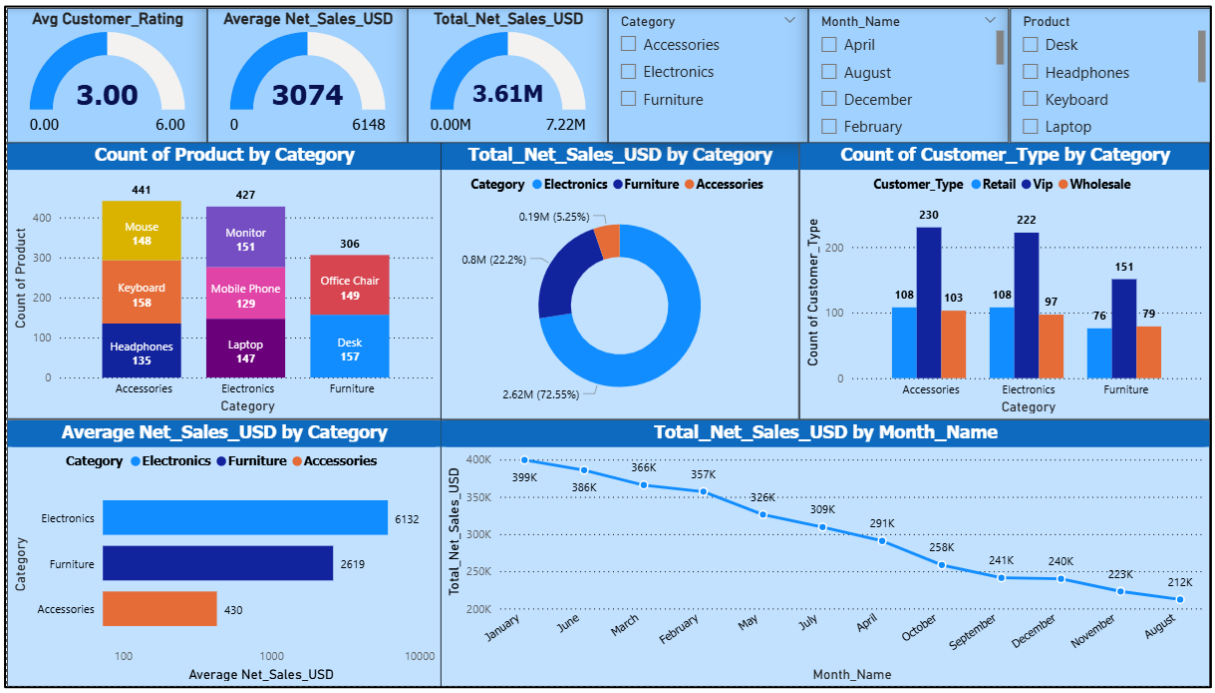
Project: Retail Sales Analysis of an Electronics Store in Myanmar (2020–2023)

Dashboard 1: Category Performance Analysis



Dashboard 2: Regional & Sales_Channel Analysis

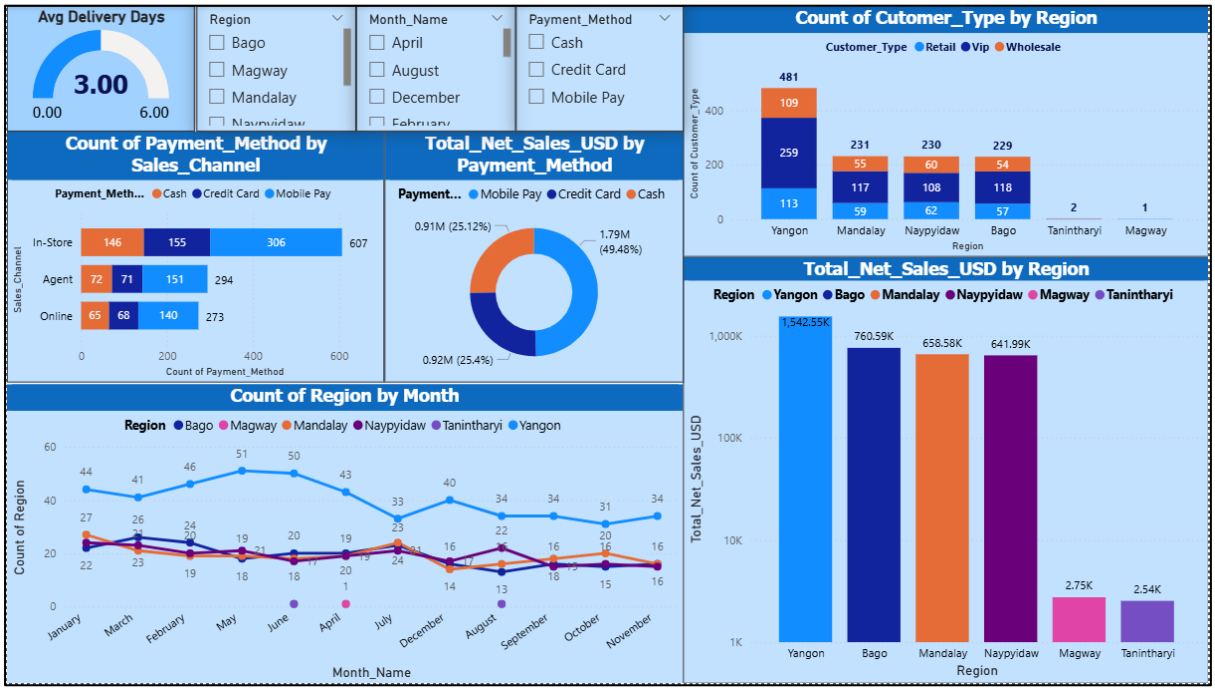


Chart 1: Gauges (Avg Customer Rating, Avg Sales, Total Sales)

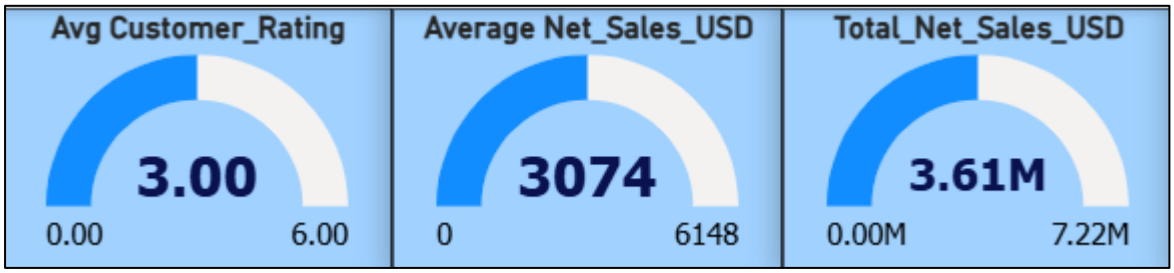
Summary

These gauge visuals show **overall business performance indicators**:

- Average customer rating
- Average sales per transaction
- Total revenue

They provide a quick snapshot of how the business is performing.



Key Insights

- **Average Customer Rating is 3.0**
  Indicates moderate satisfaction (not excellent)
- **Average Sales is 3074**
  Shows a balanced transaction value across categories
- **Total Sales reached 3.61M**
  Strong overall revenue performance

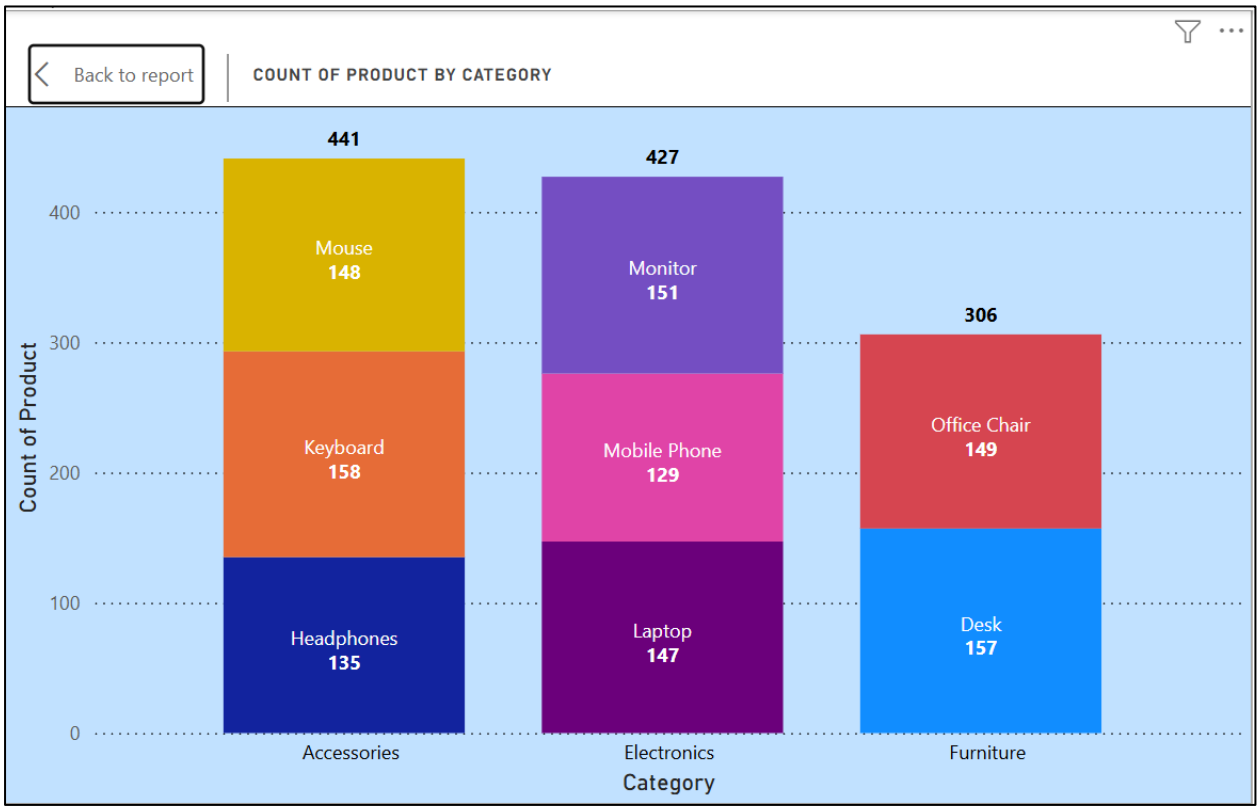
Business Recommendations

- Improve **customer experience** to increase ratings (service, delivery, quality)
- Focus on **upselling and cross-selling** to increase average sales
- Maintain strong **revenue performance** by focusing on top categories (Electronics)

Chart 2: Count of Product by Category

Summary

This chart shows the **number of products available in each category** - Accessories, Electronics, and Furniture - along with their individual product types.



Key Insights

- **Accessories has the highest product count (441)**
  Includes Mouse (148), Keyboard (158), Headphones (135)
- **Electronics is slightly lower (427)**
  Includes Monitor (151), Laptop (147), Mobile Phone (129)
- **Furniture has the lowest product count (306)**
  Includes Desk (157) and Office Chair (149)
- **Product distribution within each category is fairly balanced**
  No extreme dominance by a single product
- **Accessories and Electronics offer more variety compared to Furniture**

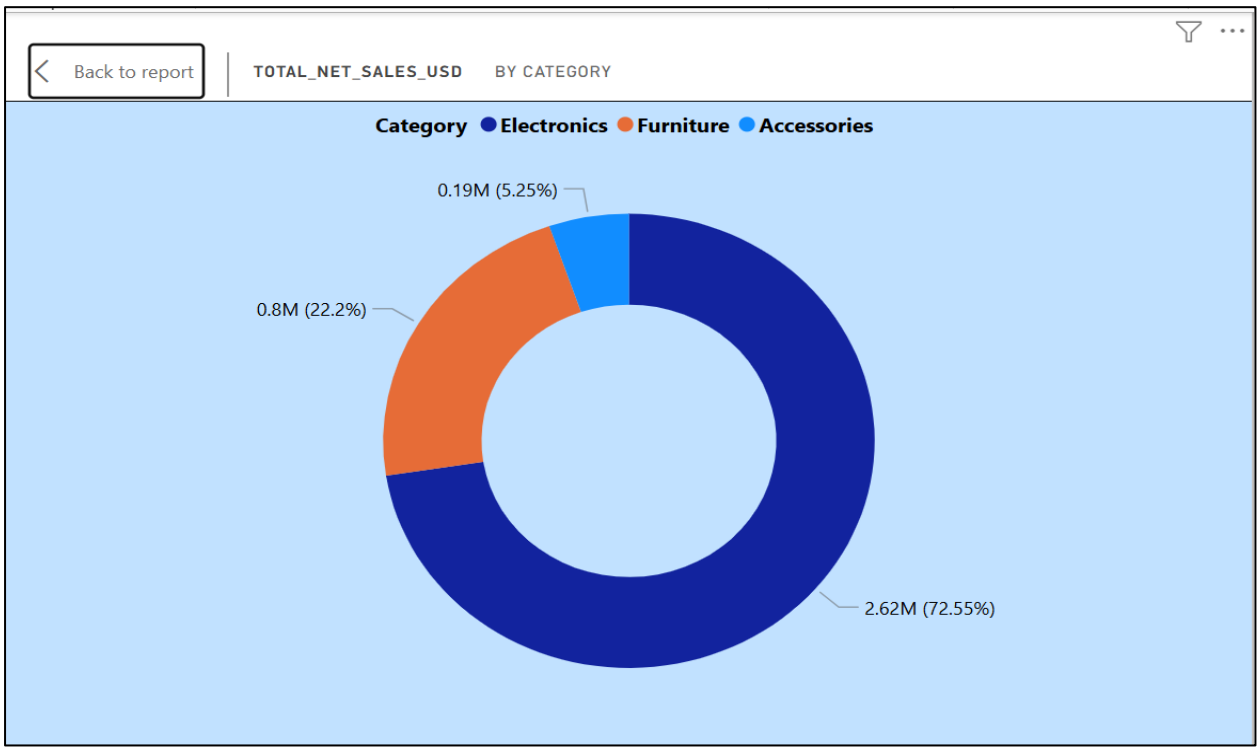
Business Recommendations

- Expand **Furniture product range** to improve variety and potential sales
- Maintain strong product availability in **Accessories and Electronics**
- Introduce **new product variants** in high-performing categories
- Use **bundling strategies** (e.g., Accessories with Electronics) to increase sales

Chart 3: Total Net Sales by Category

Summary

This chart shows the **distribution of total revenue across product categories**.
Electronics contributes the majority of total sales, followed by Furniture, while Accessories contribute a very small portion.



Key Insights

- **Electronics generates the highest revenue (2.62M, 72.55%)**
  Dominates overall sales performance
- **Furniture contributes moderate revenue (0.8M, 22.2%)**
  Second highest contributor
- **Accessories contributes the lowest revenue (0.19M, 5.25%)**
  Very small share despite product availability
- Large gap between Electronics and other categories
  Revenue is heavily concentrated in one category

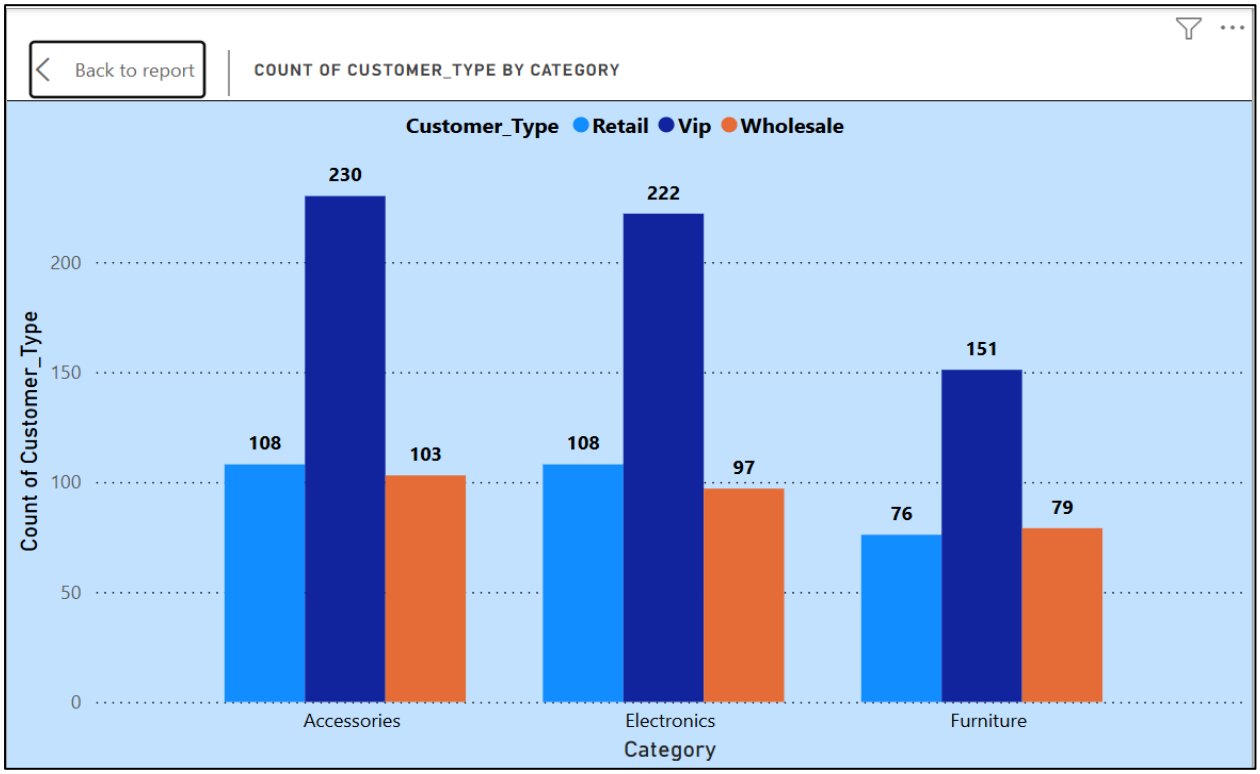
Business Recommendations

- Focus on **Electronics** to sustain and maximize revenue
- Improve **Accessories sales performance** through promotions and bundling
- Strengthen **Furniture category** to balance revenue contribution
- Reduce dependency on a single category by diversifying growth

Chart 4: Count of Customer Type by Category

Summary

This chart shows the **distribution of customer types (Retail, VIP, Wholesale) across different product categories**. VIP customers are the highest in all categories, followed by Retail and then Wholesale.



Key Insights

- **VIP customers are highest in all categories**
  Accessories (230), Electronics (222), Furniture (151)
- **Retail customers are consistent in Accessories and Electronics (108 each)**
  Lower in Furniture (76)
- **Wholesale customers are lowest across all categories**
  Accessories (103), Electronics (97), Furniture (79)
- **Furniture has overall lower customer counts across all segments**
  Indicates lower demand or fewer transactions
- **Customer distribution pattern is consistent across categories**
  VIP > Retail > Wholesale

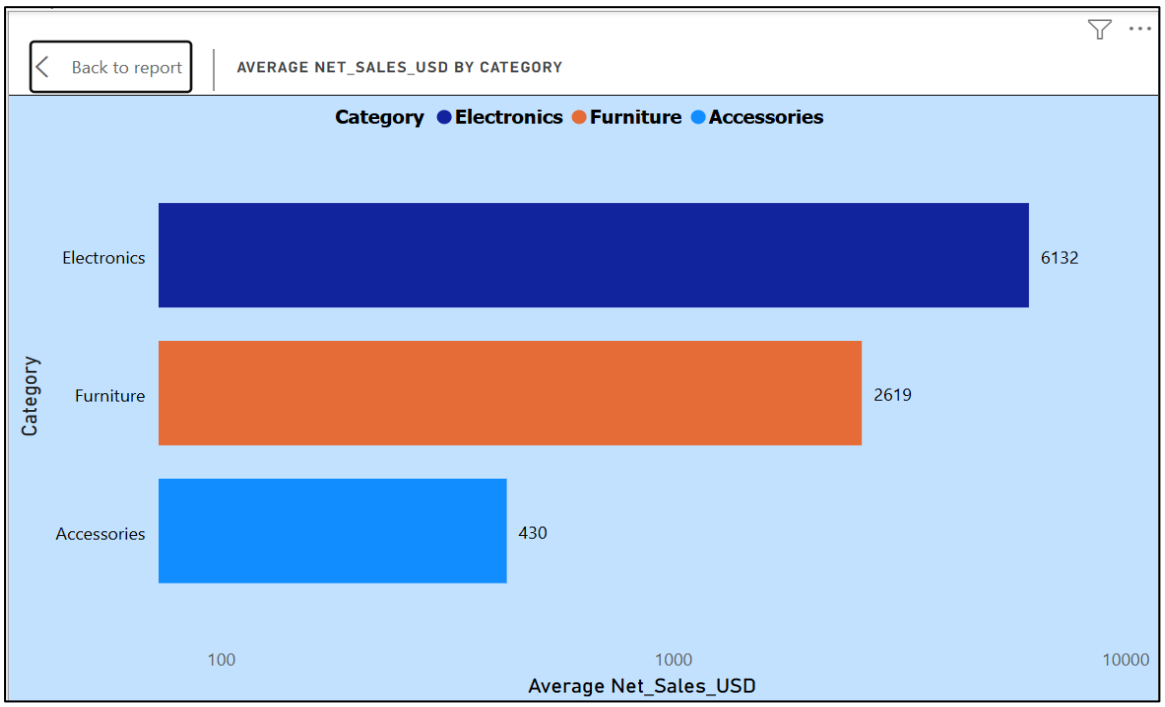
Business Recommendations

- Focus on **VIP customer retention** (loyalty programs, exclusive offers)
- Increase **Retail to VIP conversion** through targeted strategies
- Improve **Wholesale engagement across all categories** (pricing, bulk offers)
- Boost **Furniture demand** through promotions and better positioning

Chart 5: Average Net Sales USD by Category

Summary

This chart shows the **average sales value per transaction** for each category.
Electronics has the highest average sales, followed by Furniture, while Accessories have the lowest.



Key Insights

- **Electronics has the highest average sales (6132)**
  Indicates high-value products
- **Furniture has moderate average sales (2619)**
  Mid-range transaction value
- **Accessories have the lowest average sales (430)**
  Low-cost items
- **Significant gap between Electronics and Accessories**
  Strong difference in pricing/value
- **Revenue is driven more by value** (Electronics) **than volume** (Accessories)

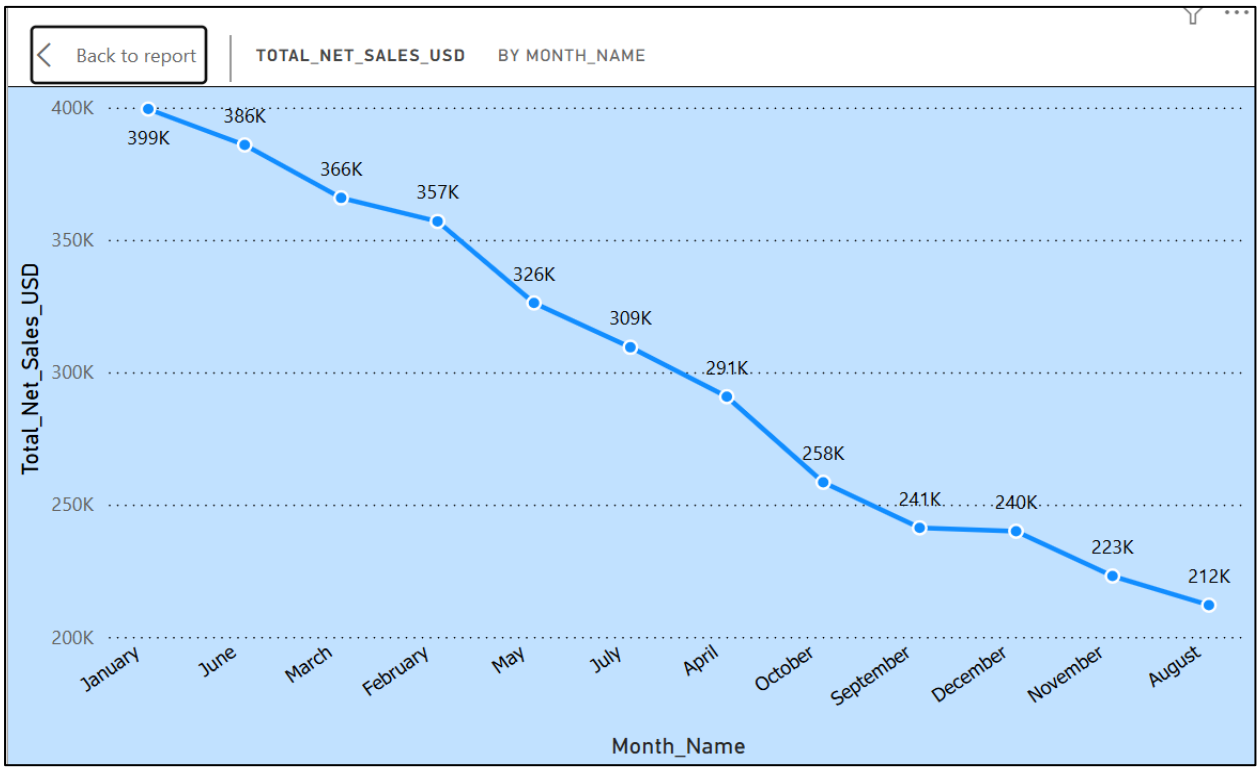
Business Recommendations

- Focus on **Electronics** to maximize high-value transactions
- Use **Accessories as add-on products** (bundling strategy)
- Improve **Furniture positioning** (premium or competitive pricing)
- Encourage **combo offers** to increase average order value

Chart 6: Total Net Sales USD by Month

Summary

This chart shows the **monthly sales trend over time**.
Sales start high at the beginning of the year and gradually decline toward the later months.



Key Insights

- **January has the highest sales (~399K)**
  Strong start of the year
- **Sales show a steady downward trend across months**
  Continuous decline in performance
- **Mid-year (March–July) shows moderate performance**
  Stable but decreasing
- **Lowest sales occur in August (~212K)**
  Almost half of January sales
- **No strong recovery in later months**
  Indicates consistent drop in demand

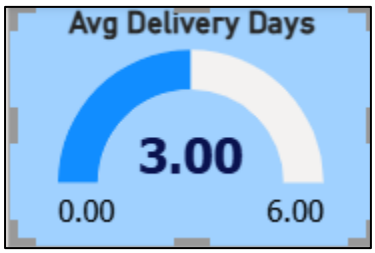
Business Recommendations

- Introduce **mid-year promotions** to prevent decline
- Launch **seasonal campaigns** after Q1
- Analyze reasons for drop (competition, demand, pricing)
- Focus on **retention strategies** for later months
- Plan **discounts or offers during low-performing months**

Chart 7: Gauge (Average Delivery Days)

Summary

This chart shows the **average time taken to deliver products**, which is currently **3 days**. It reflects the efficiency of the delivery process.



Key Insights

- **Average delivery time is 3 days**
  Indicates moderate delivery speed
- **Delivery is neither very fast nor very slow**
  Acceptable but not highly efficient
- **Consistent delivery performance**
  No extreme delays observed
- **Opportunity to improve for better customer satisfaction**

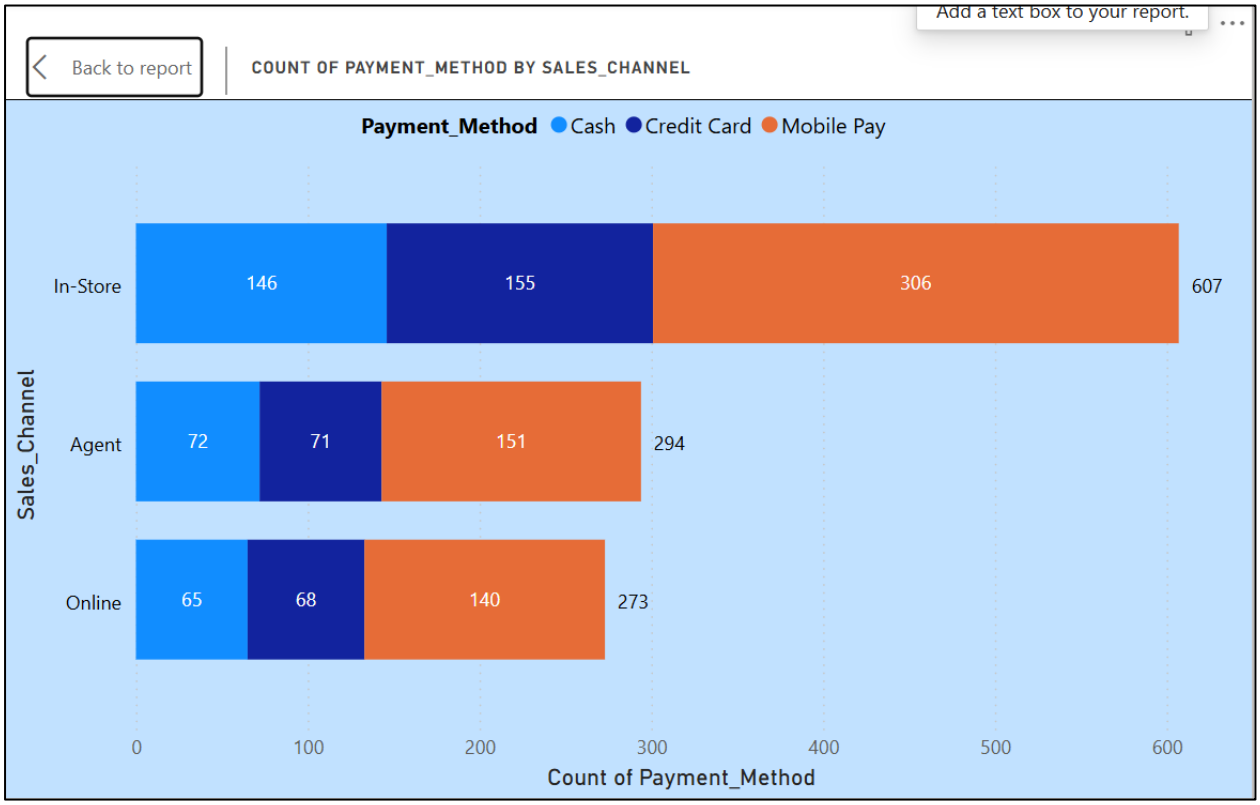
Business Recommendations

- Optimize **logistics and supply chain** to reduce delivery time
- Aim for **2 days or less delivery** for competitive advantage
- Improve **last-mile delivery efficiency**
- Offer **fast delivery options for VIP customers**

Chart 8: Count of Payment Method by Sales Channel

Summary

This chart shows how different **payment methods (Cash, Credit Card, Mobile Pay)** are used across various **sales channels (In-Store, Agent, Online)**. Mobile Pay is the most commonly used payment method across all channels, and In-Store has the highest overall transactions.



Key Insights

- **In-Store channel has the highest total transactions (607)**
  Cash (146), Credit Card (155), Mobile Pay (306)
- **Agent channel has moderate transactions (294)**
  Mobile Pay (151) is highest within this channel
- **Online channel has the lowest transactions (273)**
  Lower usage compared to other channels
- **Mobile Pay is the most used payment method across all channels**
  In-Store (306), Agent (151), Online (140)
- **Cash and Credit Card usage are relatively similar across channels**
  No major difference between

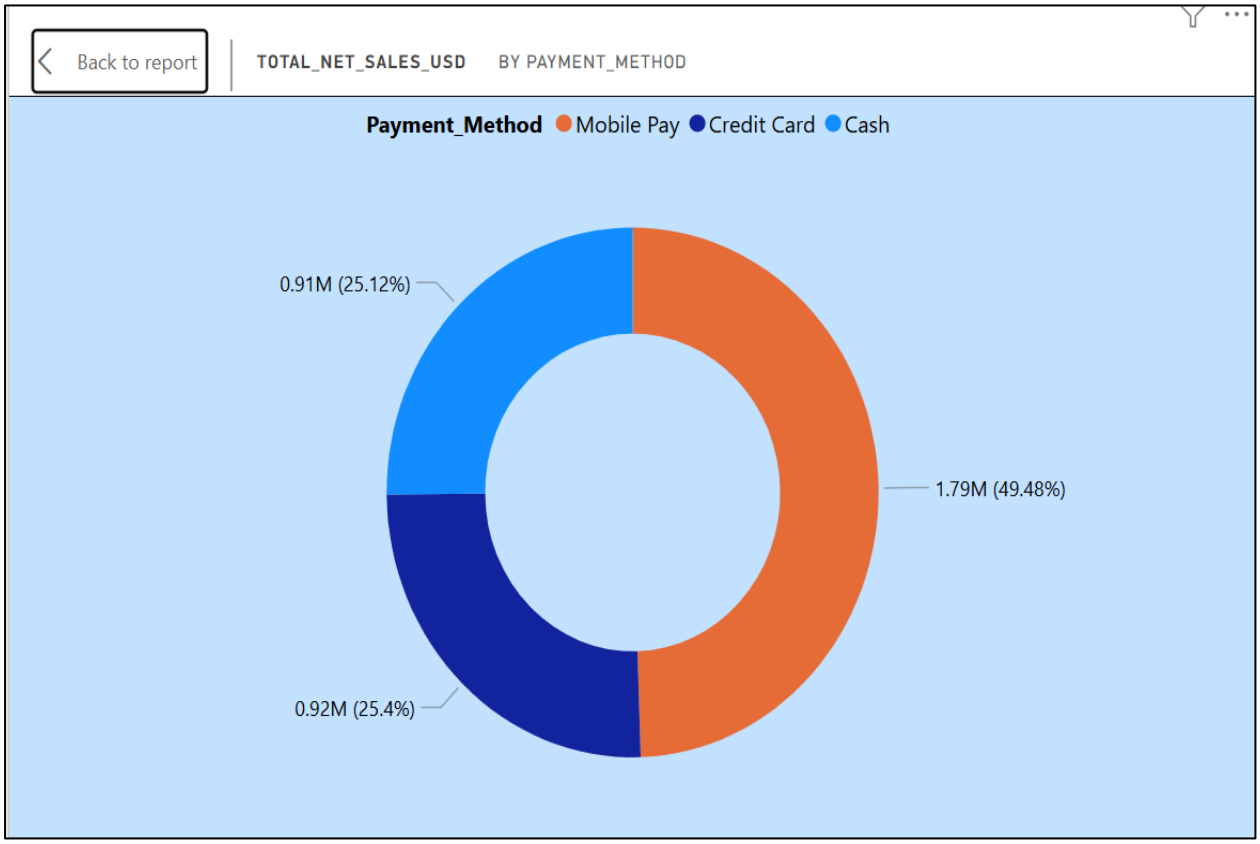
Business Recommendations

- Promote **Mobile Pay** with offers to maintain and increase usage
- Improve **Online channel performance** (user experience, marketing)
- Expand successful **In-Store strategies to other channels**
- Encourage **digital payments** over traditional methods for efficiency
- Strengthen **Agent channel performance** to match In-Store

Chart 9: Total Net Sales USD by Payment Method

Summary

This chart shows the **distribution of total revenue across different payment methods**. Mobile Pay contributes the largest share of revenue, while Credit Card and Cash contribute almost equally.



Key Insights

- **Mobile Pay contributes the highest revenue (~49.5%, 1.79M)**
  Most preferred and impactful payment method
- **Credit Card (~25.4%) and Cash (~25.1%) are almost equal**
  Traditional methods still relevant
- **Digital payments (Mobile Pay) dominate overall transactions**
  Shift towards cashless economy
- **Revenue distribution is highly dependent on Mobile Pay**

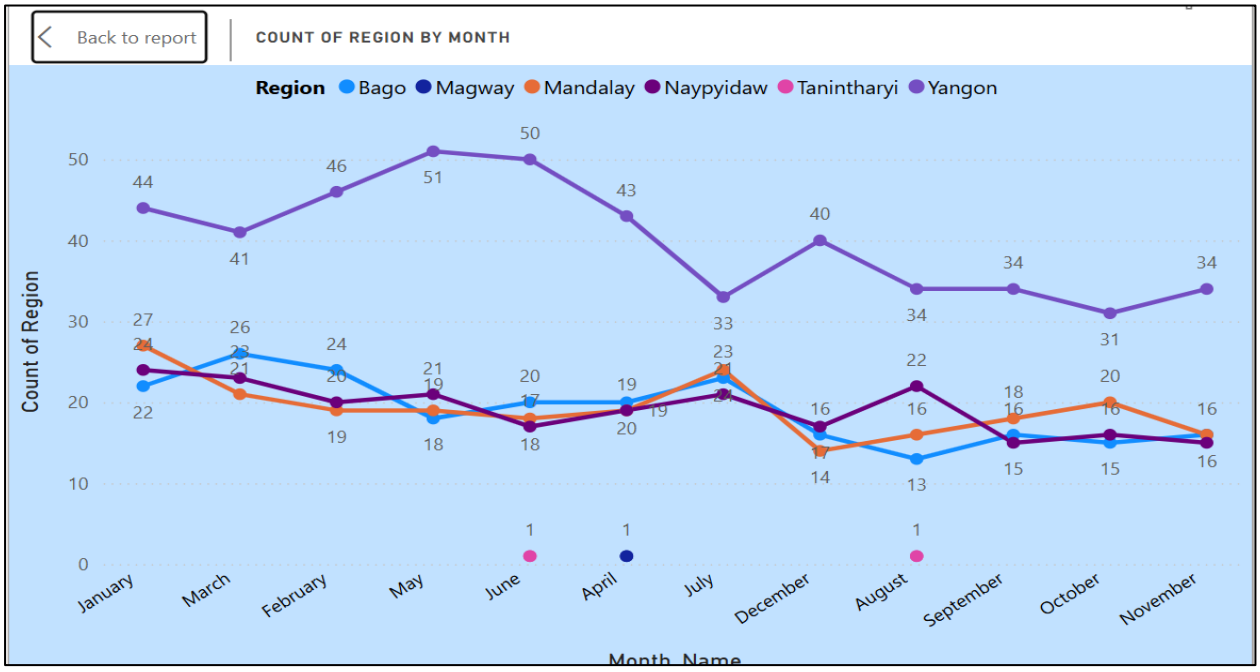
Business Recommendations

- Promote **Mobile Pay with offers/cashbacks** to maintain dominance
- Improve **Credit Card and Cash incentives** to balance usage
- Encourage **cashless transactions** for efficiency
- Partner with **digital payment platforms** to increase adoption
- Use payment-based offers to influence customer behavior

Chart 10: Count of Region by Month

Summary

This chart shows how **regional counts vary across different months**.
Yangon consistently records the highest counts across all months, while other regions show moderate and fluctuating values.



Key Insights

- **Yangon has the highest counts across all months**
  Peaks around 51 and stays consistently above other regions
- **Other regions (Bago, Mandalay, Naypyidaw, Magway)** show moderate values
  Mostly range between ~13 to ~27
- **Fluctuation observed across months for most regions**
  No stable trend pattern
- **Drop observed in mid-to-late months (July–October)**
  Indicates possible seasonal decline
- **Tanintharyi shows very minimal presence (values around 1)**
  Negligible contribution

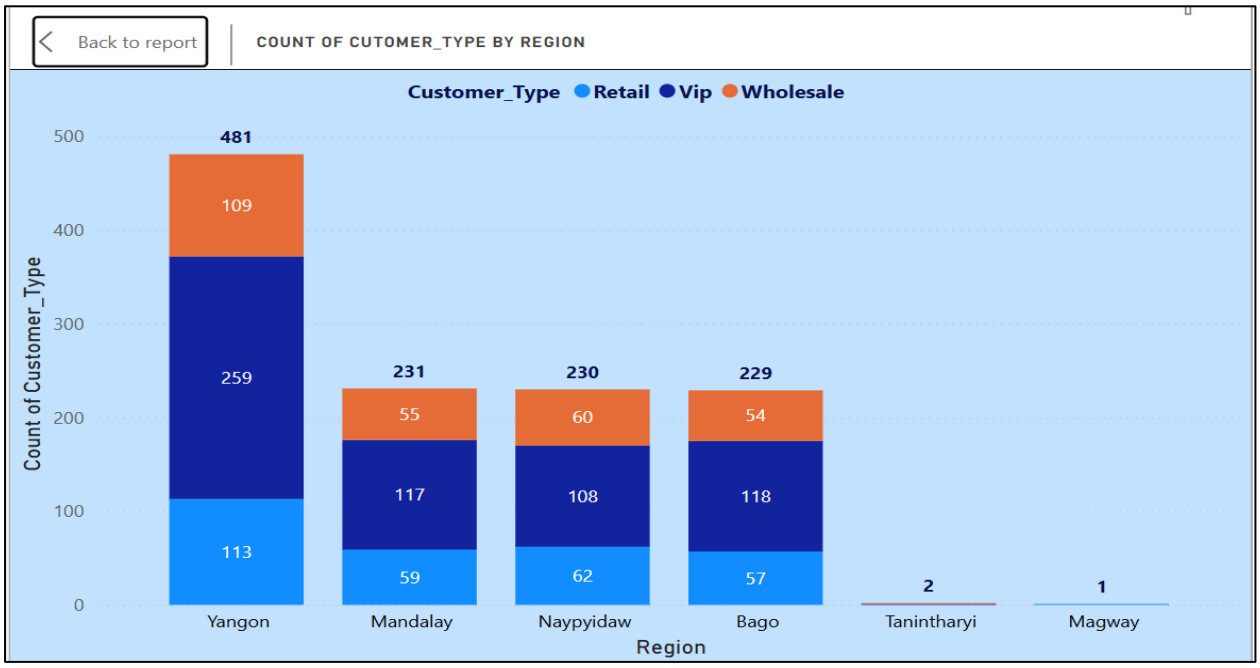
Business Recommendations

- Focus on **Yangon as the primary region for growth and retention**
- Improve performance in **low-performing regions (especially Tanintharyi)**
- Implement **region-specific marketing strategies**
- Analyze reasons for fluctuations (seasonality, demand changes)
- Expand successful strategies from Yangon to other regions

Chart 11: Count of Customer Type by Region

Summary

This chart shows how different **customer types (Retail, VIP, Wholesale)** are distributed across regions. Yangon has the highest number of customers across all segments, while other regions have significantly lower counts.



Key Insights

- **Yangon dominates with the highest total customers (481)**
  Major business hub
- **VIP customers are highest in all regions**
  Especially strong in Yangon (259)
- **Mandalay, Naypyidaw, and Bago show moderate and similar patterns (~230 range)** Balanced regional performance
- **Tanintharyi and Magway have extremely low counts**
  Minimal contribution to business
- **Customer distribution pattern is consistent across regions**
  VIP > Retail > Wholesale

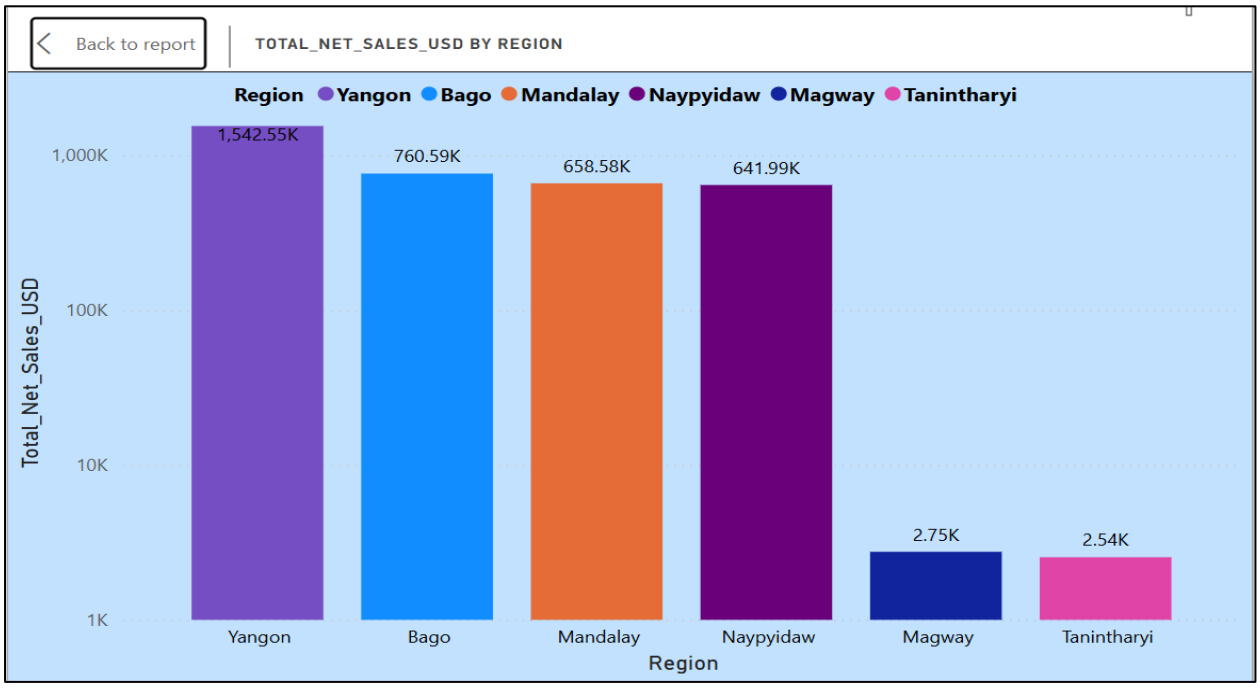
Business Recommendations

- Focus heavily on **Yangon for revenue growth and retention**
- Expand marketing efforts in **low-performing regions (Tanintharyi, Magway)**
- Strengthen **VIP customer programs across all regions**
- Increase awareness and accessibility in smaller regions
- Replicate successful strategies from Yangon in other regions

Chart 12: Total Net Sales USD by Region

Summary

This chart shows how **total revenue is distributed across different regions**. Yangon generates the highest sales by a large margin, while Magway and Tanintharyi contribute very little.



Key Insights

- **Yangon is the top-performing region (~1.54M)**
  Major contributor to total revenue
- **Bago, Mandalay, and Naypyidaw have moderate and similar sales (~640K–760K)**
  Secondary revenue contributors
- **Magway and Tanintharyi have extremely low sales (~2K–3K)**
  Minimal contribution
- **Huge gap between Yangon and other regions**
  Strong regional imbalance
- **Revenue concentration is highly dependent on Yangon**

Business Recommendations

- Focus on **Yangon to maintain strong revenue performance**
- Expand successful strategies from Yangon to other regions
- Improve **low-performing regions (Magway, Tanintharyi)** through marketing and distribution
- Strengthen **mid-performing regions** to balance revenue contribution
- Reduce dependency on a single region by diversifying growth

Top 5 Key Insights

1) Electronics drives the business
   - Contributes **~72% of total revenue**
   - Highest average sales per transaction
     👉 Core profit generator

2) Accessories underperform despite high product count
   - Highest number of products
   - Lowest revenue contribution (~5%)
     👉 Inefficient product performance

3) Yangon is the dominant region
   - Highest customers + highest sales (~1.5M)
     👉 Main business hub

4) VIP customers are the most valuable
   - Highest count across all categories and regions
     👉 Key target segment

5) Sales decline over time
   - Peak in January (~399K)
   - Lowest in later months (~212K)
     👉 Seasonal or demand issue

Business Recommendations

1) Product Strategy
   - Focus on Electronics expansion
   - Improve Accessories sales (bundling, offers)
   - Strengthen Furniture positioning

2) Regional Strategy
   - Expand success model from **Yangon to other regions**
   - Improve low-performing regions (**Magway, Tanintharyi**)

3) Customer Strategy
   - Retain **VIP customers (loyalty programs)**
   - Convert **Retail → VIP**

4) Sales & Marketing
   - Introduce **mid-year promotions**
   - Boost **low-performing months**

5) Digital Strategy
   - Promote **Mobile Pay (cashback, offers)**

6) Improve **Online sales channel**

Final Project Summary

1. Descriptive Analysis (What happened?)

- The analysis shows that **Electronics is the top-performing category**, contributing the highest revenue due to its high average transaction value. In contrast, **Accessories have a high product count but generate very low revenue**, indicating a gap between product volume and profitability.
- From a regional perspective, **Yangon dominates both customer count and total sales**, making it the primary business hub. Other regions contribute moderately, while regions like **Magway and Tanintharyi show very low performance**.
- Customer analysis reveals that **VIP customers are the most dominant segment**, consistently contributing the highest number of transactions across categories and regions.

2. Diagnostic Analysis (Why it happened?)

- The high revenue from Electronics is driven by its **high-value transactions**, while Accessories generate lower revenue due to their **low-cost nature**.
- Yangon's dominance is supported by its **higher concentration of customers**, especially VIP customers, who contribute more transactions and revenue.
- The **moderate customer rating (3.0)** and **average delivery time (3 days)** indicate that customer experience is acceptable but has room for improvement.
- The **declining monthly sales trend** suggests possible **seasonality or lack of sustained marketing strategies**.

3. Predictive Analysis (What could happen?)

- Based on monthly trends, sales are **highest at the beginning of the year and gradually decline over time**.
- If this pattern continues, the business may face **reduced revenue in future periods**, especially without strategic intervention. This insight supports better **planning for promotions, inventory, and sales strategies**.

4. Prescriptive Analysis (What should be done?)

To improve overall business performance, the following actions are recommended:

- Focus on **Electronics category** to maximize revenue
- Improve **Accessories performance** through bundling and promotions
- Expand successful strategies from **Yangon to other regions**
- Target and retain **VIP customers**
- Introduce **mid-year promotions** to address declining sales
- Improve **delivery efficiency** to enhance customer satisfaction
- Promote **Mobile Pay and digital transactions**
- Strengthen **online sales channels**
